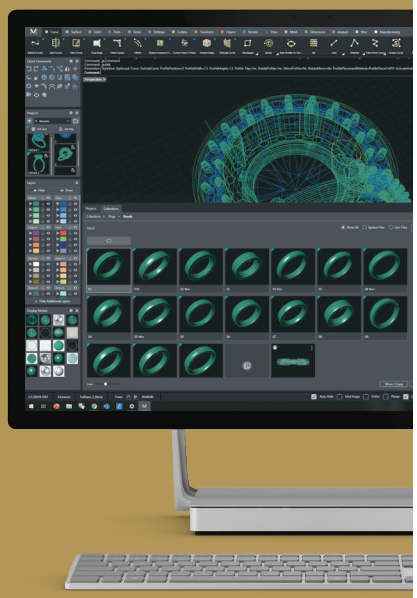
MATRIXGOLD®

UNLIMITED DESIGN POSSIBILITIES

If you're an ambitious designer who wants total creative exploration to build jewelry from a blank slate, **MatrixGold®** has the features you need. MatrixGold offers advanced design power and a considerable productivity boost.

SKILL LEVEL 5/5

COMPATIBILITY



As our most powerful CAD software, MatrixGold draws upon its parametric core and the strengths of its predecessors, Matrix® and RhinoGold, to bring you an array of features and benefits. These include

- Dynamic Booleans, which allow you to edit the steps prior to the Boolean operation
- Parametric history, which allows you to create your own flexible custom library to make quick edits and variations of your models
- Collections that provide a starting point for your designs, along with the ability to build your own libraries
- A user interface that's customizable to your work preferences and intuitive workflows, reducing the learning curve

Everything about MatrixGold was designed to make you a more efficient designer and unleash your full customization potential: the upgraded CAD engine, the improved speed and responsiveness, the new content organization.

CLAYOO

This freeform, organic modeling plugin provides functions similar to carving and shaping physical clay. Clayoo runs inside MatrixGold and is included with your MatrixGold purchase.
